

NSW DEPARTMENT OF
PRIMARY INDUSTRIES

File No. 04/2381

The Leaseholder
West Wallsend Colliery
PO Box 4186
Edgeworth NSW 2285

15th November 2007

Attention: Mr. Mark Robinson.

Dear Mark,

**Subsidence Management Plan Application for Longwalls 38-42 at West
Wallsend Colliery.**

The Deputy Director General of the Department of Primary Industries (DPI) has approved the Subsidence Management Plan (SMP) application for West Wallsend Colliery Longwalls 38-42.

The conditions of approval are enclosed with this letter. The approved plans are now the plans enclosed with this letter, that Plan number is KA1-147 and KAO-50, signed by the Mine Manager on 7th February 2007, and approved by the Deputy Director General of DPI on 9th November 2007.

Should you be uncertain about any aspect of the subsidence management requirements, please contact Jonathon Smith, Subsidence Officer, on 4931 6448.

Yours sincerely

J. S. Clark
for

Greg Cole-Clark
Chair, Interagency Committee

Subsidence Management Plan Approval

I, the Director-General, Department of Primary Industries, having considered the likely environmental impacts of the mining operations identified in the Project Description specified in Schedule 1 and having had regard to the principles of ecologically sustainable development as defined in the *Protection of the Environment Administration Act 1991*, hereby approve the Subsidence Management Plan identified in Schedule 1 for the purposes of the SMP Condition that became effective on 18/3/2004 in Consolidated Coal Lease No. CCL725, CCL718 and Mining Lease ML1451, subject to the conditions set out in Schedule 2.

This Approval only authorises the underground mining operations identified in the Project Description for the Period identified in Schedule 1. Obligations under this Approval regarding rehabilitation, monitoring and impact management continue to apply after the expiry of this period unless otherwise notified in writing by the Director-General.

These conditions are required to:

- ensure optimal mineral resource recovery;
- prevent, minimise, manage and/or offset adverse impacts;
- provide for the ongoing environmental management of the project;
- ensure the area disturbed by mining is appropriately rehabilitated.

The rights and duties of a Leaseholder are those prescribed by the *Mining Act 1992*, subject to the terms and conditions of the Lease which include a requirement to carry out operations in accordance with the Subsidence Management Plan conditionally approved by this Approval. This Subsidence Management Plan Approval does not override any obligation on the Leaseholder to comply with the requirements of other legislation and regulatory instruments unless specifically provided in the Mining Act or other legislation or regulatory instruments.

Note: This Approval does not constitute an approval under Section 138 Coal Mines Regulation Act 1982 or clause 88 of the Coal Mines Health and Safety Regulation 2006.

SIGNED

Alan Coultis
Deputy Director-General
NSW Department of Primary Industries

Date of Approval:

9 November 2007

File No: 04/2381

SCHEDULE 1
Description of Approved Activity

Project Description: West Wallsend Colliery, Longwalls 38 to 42
Subsidence Management Plan: West Wallsend Colliery Subsidence Management Plan LW 38-42, dated February 2007, and any supplementary supporting information provided to the Department.

Seam: West Borehole
Approved Period of Mining: Date of Approval to 1 November 2014 or expiry/cancellation of CCL725 or CCL718 or ML1451 whichever occurs first.

W

SCHEDULE 2

Definitions

Activity	The proposed longwall mining described in the SMP
Application Area	The area identified within the SMP.
Bore	Any bore or well connected or proposed to be connected with sources of sub-surface water, and used or proposed to be used or capable of being used to obtain supplies of such water
DECC	Department of Environment and Climate Change
Department	Department of Primary Industries
Director General	Director General of the Department of Primary Industries, or delegate
DWE	Department of Water and Energy
DoP	Department of Planning
Environment	includes all aspects of the surroundings of humans, whether affecting any human as an individual or in his or her social groupings
Leaseholder	The leaseholder of Consolidated Coal Lease No.CCL725, CCL718 and Mining Lease ML 1451
Longwall mining	The extraction of the longwall panels covered by the SMP
MSB	Mine Subsidence Board
Principal Subsidence Engineer	Principal Subsidence Engineer with DPI
PSMP	Property Subsidence Management Plan
SMP	Subsidence Management Plan, titled West Wallsend Colliery Subsidence Management Plan LW 38-42 and supplementary supporting information provided to the Department
SMP Approved Plan	Plan No. KA1-147 and KAO-50, signed by the Mine Manager on 7-02-2007 and approved by the Director General, NSW Department of Primary Industries
Subsidence Impacts	Direct or indirect impacts resulting from subsidence from longwall mining
Subsidence	Movement and/or deformation of the ground surface or subsurface strata as a direct and/or indirect result of longwall mining

Conditions

Limits on Approval

- 1 The Leaseholder must carry out the activity strictly in accordance with SMP Approved Plan.
- 2 The Leaseholder must carry out the activity generally in accordance with the SMP subject to the conditions of this Approval.

In the event of any inconsistency between the conditions of this Approval and the SMP, the conditions of this Approval prevail to the extent of any inconsistency.
- 3 Where this Approval requires actions to be undertaken by the Leaseholder, including remediation of subsidence impacts, the obligation continues until the Director General notifies the Leaseholder that the action has been completed to his or her satisfaction.
- 4 The Director General may vary the conditions of this Approval by notice in writing.
- 5 The Director General may, at his or her discretion, suspend or revoke this Approval if:

- a) the Leaseholder fails to adhere to any condition of the Approval; or
- b) the head of any other government authority requests suspension or revocation on the basis of the Leaseholder's non-compliance, or potential non-compliance, with legislation administered by that agency related to this Approval.

General Obligation to Minimise Harm to the Environment

- 6 The Leaseholder must implement the SMP (as amended by the conditions of this Approval) and carry out any additional practicable measures necessary to prevent and/or minimise any harm to the environment that may result from the construction, operation, or rehabilitation of the activity.

Notification of Approval

- 7 The Proponent must give notice of this SMP approval to the DoP, DWE, DECC, Council, MSB, NSW Heritage Office, the local Aboriginal Land Councils, the owners/operators of any infrastructure, and landowners in the application area that Director General's approval of the SMP has been granted.

Note: Relevant government authorities and stakeholders are listed in the Guideline for Application for Subsidence Management Approvals.

Implementation of Approval

- 8 Any plans, programmes, reports or strategies required as a condition of this Approval must be developed having regard to any guidelines adopted by the Director General for the purpose of subsidence management and mine rehabilitation.
- 9 The Leaseholder must implement any plan, programme or strategy required and approved pursuant to this Approval.

Note: The Leaseholder may, at any time, submit an amended plan, programme or strategy for approval. Once approved, the amended plan, programme or strategy must be implemented, however, up until the date of approval, the Leaseholder must continue to implement the previously approved plan, programme or strategy.

- 10 Any modifications to plans, programs or strategies already approved for the purposes of the conditions of this Approval must have regard to the matters set out in condition 8. Amended plans, programmes or strategies submitted for approval must be accompanied by all relevant supporting documentation to assist in the assessment of the amendment or modification.

Note: This condition relates to plans, programmes and strategies required by the conditions of this Approval – it does not apply to variations to the SMP or the SMP Approved Plan which must be done in accordance with the requirements of the Mining Act, the conditions of title and the variation procedures identified in the SMP guidelines.

Directions

- 11 The Leaseholder must comply with any written direction given by the Director-General, Director Environmental Sustainability, Director Mine Safety Operations or Principal Subsidence Engineer relating to:
- a) the implementation of any aspect of the SMP or an approved plan, programme or strategy;
 - b) assessing or reviewing the adequacy, effectiveness, or coverage of any approved plan, programme or strategy or any aspect of the SMP;
 - c) the type, timing and/or location of monitoring of baseline conditions, subsidence or subsidence impacts;
 - d) any reporting requirement under this Approval;
 - e) the carrying out of works to address subsidence impacts; and/or
 - f) the carrying out of any studies or investigations related to subsidence or subsidence impacts and the reporting of any findings or conclusions.

The obligations under this condition prevail over any other obligation under this Approval.

Note: *Compliance with a written direction will not operate as a defence to a breach of any obligation under this Approval that occurred prior to the Direction being given.*

Subsidence Monitoring

- 12 The Leaseholder must submit to the Principal Subsidence Engineer for approval a subsidence monitoring programme for the longwall panels which are the subject of this Approval. This programme must include:
- a) inspection regimes;
 - b) layout of monitoring points;
 - c) parameters to be measured;
 - d) monitoring methods and accuracy;
 - e) timing and frequencies of surveys and inspections;
 - f) recording and reporting of monitoring results.

The Leaseholder must not commence longwall mining prior to the subsidence monitoring programme being approved.

Note: *The programme should be submitted to the Principal Subsidence Engineer at least 30 days prior to the expected commencement of operations to enable sufficient time for the assessment of the programme. The Principal Subsidence Engineer may require the provision of further information to assist in the assessment of the programme or a resubmission of the programme if it is considered inadequate. Complex issues or the need for additional information or a resubmission of the programme may require a longer assessment period.*

Environmental Management

- 13 The Leaseholder must prepare an environmental monitoring and management programme for the longwall panels which are the subject of this Approval. This programme must be to the satisfaction of the Director Environmental Sustainability and is to address subsidence impacts on watercourses and an updated procedure for remediation.

Mining must cease if a satisfactory management plan has not been approved within 4 months of the date of this approval.

***Note:** The programme should be submitted to the Director Environmental Sustainability with sufficient time permitted for assessment of the programme. The Director Environmental Sustainability may require the provision of further information to assist in the assessment of the programme or a resubmission of the programme if it is considered inadequate. Complex issues or the need for additional information or a resubmission of the programme may require a longer assessment period.*

Water Management Plan

- 14 The Leaseholder must not commence longwall mining prior to a Water Management Plan for the longwall panels which are the subject of this Approval being developed in consultation with DWE and to the satisfaction of the Director Environmental Sustainability.

Water Supply Compensation

- 15 In the event of interruptions to water supplies (water quality and/or quantity) due to subsidence impacts on water supply systems and/or sources, the Proponent must provide water supplies of equivalent quality and quantity to those affected until such time that the water supply systems and/or sources are restored.

Infrastructure and Property Management

- 16 The Leaseholder must not undertake longwall extraction within 800m of any of the following infrastructure unless management plans developed in consultation with the infrastructure owner/operators for each infrastructure item and the longwall being extracted are approved by the Director of Mine Safety Operations:
- a) F3 Freeway and associated structures;
 - b) Wakefield Road and associated structures;
 - c) Gas and fuel pipelines adjacent to the F3 freeway;
 - d) Telecommunication infrastructure adjacent to the F3 Freeway and Wakefield Road; and
 - e) Any other infrastructure if required by the Director of Mine Safety Operations.

Public Safety

- 17 The Leaseholder must submit to the Director Mine Safety Operations for approval a plan to manage public safety in any surface areas that may be affected by subsidence. The Leaseholder must not commence longwall mining prior to this plan being approved.

Note: The Plan may make reference to public safety management procedures contained in other management plans.

Incident and Ongoing Management Reporting

- 18 The Leaseholder must, within 24 hours of becoming aware of the occurrence, notify:
- the Principal Subsidence Engineer;
 - the operators of all infrastructure covered by condition 16; and
 - other relevant stakeholders,
- of the following:
- a) Any significant unpredicted and/or higher-than-predicted subsidence and/or abnormalities in the development of subsidence;
 - b) Any exceedance of predicted impacts on groundwater resources and/or the natural environment that may have been caused (whether partly or wholly) by subsidence;
 - c) Any observed subsidence impacts adverse to the serviceability and/or safety of infrastructure and other built structures that may be affected by longwall mining;

Note: Under Condition 11, the Leaseholder can be directed to, among other things, prepare a report on an incident reported under this condition. A report on the details of the incident, including likely or known causes, response action and proposed response measures will generally be required for incidents that involve material property or environmental damage or have the potential to cause such damage.

- 19 The Leaseholder must prepare and maintain a Subsidence Management Status Report which must include but not be limited to:
- a) the current face position of the longwall panel being extracted;
 - b) a summary of any subsidence management actions undertaken by the Leaseholder in the period subsequent to the last regular submission of the Status Report;
 - c) a summary of any comments, advice and feedback from consultation with stakeholders in relation to the implementation of this Approval (including the preparation, implementation and review of plans, programmes, reports or strategies required by this approval) undertaken or received in the period subsequent to the last regular submission of the Status Report and a summary of the Leaseholder's response to the comments, advice and feedback given by the stakeholders;
 - d) a summary of the observed and/or reported subsidence impacts, incidents, service difficulties, community complaints, and any other relevant information reported to the Leaseholder in the period subsequent to the last regular submission of the Status Report and a summary of the Leaseholder's response to these impacts, incidents, service difficulties and complaints;
 - e) a summary of subsidence development based on monitoring information compared with any defined triggers and/or the predicted subsidence to facilitate early detection of potential subsidence impacts;
 - f) a summary of the adequacy, quality and effectiveness of the implemented management processes based on the monitoring and consultation information summarised above; and
 - g) a statement regarding any additional and/or outstanding management actions to be undertaken or the need for early responses or emergency procedures to ensure adequate management of any potential subsidence impacts due to longwall mining.

The Subsidence Management Status Report must be updated at least every 14 days to reflect any changes in the information required to be included in the Report. The Status Report must be regularly submitted to the Principal Subsidence Engineer and each operator of infrastructure referred to in condition 16 every four (4) months from the date of this Approval. The Status Report (as updated from time to time) must be provided, upon request, to the Mine Subsidence Board, the Director of Environmental Sustainability, the Principal Subsidence Engineer of the Department of Primary Industries, owners/operators of any infrastructure within the application area and any other stakeholders.

End of Panel Report

- 20 Within 6 months of the completion of each longwall panel, an end of panel report must be prepared to the satisfaction of the Director Environmental Sustainability. The end of panel report must:
- a) include a summary of the subsidence and environmental monitoring results for the applicable longwall panel;
 - b) include an analysis of these monitoring results against the relevant;
 - impact assessment criteria;
 - monitoring results from previous panels; and
 - predictions in the SMP;
 - c) identify any trends in the monitoring results over the life of the activity; and
 - d) describe what actions were taken to ensure adequate management of any potential subsidence impacts due to longwall mining.

Access to Information

- 21 Within 3 months of the submission of an End of Panel Report (as required by Condition 20) or the approval of a plan, programme or strategy required under this Approval or the SMP (or any subsequent revision of these documents), the Leaseholder must, to the satisfaction of the Director General:
- a) provide a copy of these documents to all relevant agencies;
 - b) ensure that a copy of the relevant documents is made publicly available at the Leaseholder's regional office; and
 - c) put a copy of the relevant document/s on the Leaseholder's website.

Survey Marks

- 22 At the completion of subsidence, or otherwise as required by the Department of Lands, the functionality of any survey marks affected by subsidence must be fully restored to the satisfaction of the Department of Lands.

Archaeological and Heritage Sites

- 23 The Leaseholder must not commence LW40 until agreement has been reached with DECC and the local Aboriginal community with regard to the ongoing management of the archaeological site Western Domain 5 identified in the SMP application and its identification as an item of aboriginal heritage.
-
